Amaryllis
Daylilies

La. Native Irises
Crinum

1961-62 SEASON

The following plants are offered subject to stock being unsold on receipt of the order. With the exception of imported Amaryllis bulbs all plants are guaranteed to be true to name and to arrive at destination in good condition. Prices quoted include transportation charges within the United States for orders amounting to \$5.00 or more.

TERMS: Cash with order. Minimum prepaid order: \$5.00.

On orders of less than \$5.00 add 35¢ for postage.

AMARYLLIS

Amaryllis are one of the most spectacular and beautiful of the spring flowering bulbs. They are universally grown throughout the United States. In the Deep South they may be grown and flowered out of doors. In all parts of the country they are successfully grown indoors in pots for late winter and early spring flowers. Since they are perennials the purchase of an Amaryllis bulb represents a long time investment in beauty and pleasure.

The Ludwig Strain of named Dutch hybrids will be received from Holland in November. The "Royal Dutch Amaryllis" produced by Willem S. Warmenhoven at Hillegom, Holland, and the "Paradise Amaryllis," produced at the Royal Nurseries by G. C. Van Meeuwen & Zonen N. V., Heemstede, Holland, will be received in December, 1961.

Only a limited number of bulbs of each variety will be stocked, but the supply may be increased as needed to meet nominal demands provided your order is received by or before September 30th. Since the Ludwig varieties will be shipped from Holland in the middle of October the final order to these exporters must leave Baton Rouge on October 1st. Every season a number of customers are disappointed in receiving the varieties which they wanted because they waited too late to order, so please order early this season.

Amaryllis bulbs make nice Christmas presents to friends and relatives who are flower lovers. Send your gift card along with shipping instructions to this nursery. At the proper time your card will be mailed along with the bulbs directly to the person for whom the gift is intended.

Red leaf spot or red fire, caused by the fungus *Stagonospora curtisii*, has become wide-spread throughout the country and it seems to be present on many of the imported bulbs. To eliminate bulb-borne phase of this disease it is recommended that dormant bulbs be soaked for two hours in a solution of one ounce of commercial formaldehyde to about 1½ gallons of water. The severity of the disease on the foliage may be lessened by spraying the plants at weekly intervals with neutral copper, "Captan" or "Fermate" at the rate of 1 ounce to 2 gallons of water.

Dutch hybrid Amaryllis are of a full, flat, rounded form. Usually there are two scapes per bulb and three to four 8" flowers on each scape.

NO GUARANTEE OF VARIETIES. The growers and exporters in Holland are considered to be reliable, but occasionally a few bulbs are found to be incorrectly labeled. The exporters do not guarantee their bulbs as to variety, and this obligation cannot be assumed by the retail dealer who has never seen the bulbs in flower. Orders will be scrupulously filled in accordance with the labels on the bulbs when they are received, but this nursery makes no guarantee that the bulbs were correctly labeled in Holland.

LUDWIG HYBRID AMARYLLIS

(November arrival. Order prior to September 30th)

AMERICAN EXPRESS —Huge, medium red. Rated (AA) in Cleveland trials	\$3.25
APPLE BLOSSOM —Dawn pink and white. Very popular variety	\$2.75
ATTRACTION —An elegant capsicum red with dark, glossy throat	\$2.75
BELLA VISTA —Cherry red with dark, purple throat. Semi-trumpet shape	\$4.00
BLAZING STAR —Large, glowing red with a vivid dark red throat.....	\$3.75
BOUQUET —Begonia pink to light salmon. Rated (A) in Cleveland trials	\$3.00
BRIDESMAID —Pure white with a light green tinge in the throat.....	\$2.75
BRILLIANT —Lively signal red with a glossy, dark red throat	\$2.75
CANDY CANE —Alternately red and white in the right proportions	\$3.00
CARDINAL —An aristocratic, large glowing red with currant red throat	\$5.00
CHAMPIONS REWARD —Lively, Oriental red with a dark, glossy throat	\$3.00
CHRISTMAS GIFT —Superb white with flat form and ruffled petals	\$4.00
CIRCUS —Red with white stripes. Darker than 'Candy Cane'	\$2.75
DAINTINESS —Porcelain rose with a crimson rose glow in the throat	\$4.00
DELILAH —Begonia to salmon pink with throat shading to red	\$3.00
DIAMOND —Geranium red with a glossy red throat	\$3.00
DORIS LILIAN —Tyrian rose with carmine throat. Rated (A) at Cleveland	\$3.00
FANTASY —Bicolor of delft rose and creamy white throat	\$3.00
FIRE DANCE —Dutch vermilion with violet red in the throat	\$5.00
FIVE STAR GENERAL —Signal red with a large white star in the center	\$4.00

SCARLET TRIUMPH —Clear scarlet appearing nearly light red. (Rated A)	\$3.25
SNOW QUEEN —Excellent white with huge, flat florets. 1960 Floriade introduction	\$6.50
VIOLETTA* —8" florets of deep rose with a light rose throat. (Rated B)	\$3.25

PARADISE AMARYLLIS

(Van Meeuwen Strain)

(December delivery. Only those varieties marked with an asterisk (*) will be available for sale after October 25, 1961. Bulbs 30 cm in circumference.)

ALBINO* —Pure white which is easy to grow. Medium size flowers	\$3.25
ALCYONE* —Deep shade of dark red.	\$3.25
CHARLEMAGNE —Very large purple red	\$3.50
FABIOLA —Bright red, 8" across the face	\$3.25
FAUST —Glowing scarlet with bloodred center	\$3.25
FRIENDSHIP —Light salmon to orange red	\$4.00

GIANT GOLIATH* —Deep vermilion. 9" across the face	\$4.00
GOLDIBAR —Dark red	\$3.25
HANNIBAL —Scarlet	\$3.75
JULIA —Salmon to orange red. 7½" florets	\$3.25
KING GUSTAV ADOLF VI —Bright orange red. 8" across the face	\$4.50
QUEEN OF SHEBA* —Camellia pink to violet rose. Popular color	\$4.50
QUEEN SUPERIORA* —Dark bloodred, 7" across the face	\$3.25
ROSTENLI —White center, edged pink	\$3.50
SUPERBA —Bordeaux red	\$3.25
VERONA —Salmon pink with a white center	\$3.50
VALENDAM —White edged rose pink. 7" across the face.	\$3.50
ZENITH —Lower petals white. Upper petals dark rose changing to white in the center. 8" across the face	\$5.25

AMERICAN HYBRID STRAINS OF AMARYLLIS

The present American strains are based largely on the hybrids developed by the late Theodore L. Mead of Florida. They are more hardy and vigorous than the Dutch hybrids, but do not have the flat form and wide, rounded flowers. Crosses between the American and Dutch strains usually result in increased vigor over the Dutch and an improvement in the flowers of the American strain. The crosses of Mead hybrids with named Dutch hybrids which have bloomed at this nursery have been good shades of clear reds.

MEAD STRAIN × DUTCH HYBRIDS —Red shades, blooming size	\$1.00
MEAD STRAIN —Red and white, blooming size with good roots	\$1.00

DUTCH HYBRIDS

DUTCH HYBRID SEEDLINGS —Red shades, blooming size with good root system. Most of these bulbs produce flowers which compare favorably with many of the named Dutch varieties	\$2.00
--	---------------

SALES AT NURSERY

If still available the foregoing Amaryllis may be purchased while in flower at the nursery from the middle of April to the middle of May, depending on the season.

AMARYLLIS SPECIES AND HYBRIDS

AMARYLLIS BELLADONNA VAR. BELLADONNA —Tepalsegs scarlet, bright red or salmon with yellowish-green at base. Bolivian form introduced in 1954 by Ira S. Nelson. 1960 seedling bulbs	\$3.00
'CUENCA' —A hybrid clone collected in 1954 by Ira S. Nelson at Cuenca, Ecuador. Currant red with a large greenish-white star in the throat. A very vigorous clone, closely resembling the American hybrid strains, but with smaller flowers. 1960 seedling bulbs	\$3.00
AMARYLLIS × JOHNSONII —Red with a white keel. Thought to be a cross between <i>A. reginae</i> × <i>A. vittata</i> . Hardy outside in the lower half of the Southern States...	\$1.00
AMARYLLIS PARDINA —White ground color copiously, minutely spotted with red. The long lost Leopard Amaryllis was rediscovered by Ira S. Nelson in Bolivia in 1954. Ref.—"Herbertia" 1957, Bulletins 2, 4 and 5 of the Louisiana Society of Horticultural Research. 1960 seedling bulbs	\$5.00
'SENORITA' —Hybrid of <i>A. evansiae</i> × <i>A. striata</i> . Pastel blend of pink and yellow, changing to soft pink as the flower ages. Chartreuse star in the throat of the uptilted flowers. If self pollinated 25% of the F ₂ generation should be light yellow. 1960 seedling bulbs	\$3.00
AMARYLLIS STRIATA —Thought to be var. <i>fulgida</i> . Nasturtium red. Lower half of tepalsegs with a green base and keel. 1960 seedling bulbs	\$2.00

LOUISIANA NATIVE IRISES

These beautiful native plants may be grown in upland gardens in most parts of the United States, with the exception of the northern tier, provided they are well fertilized,

heavily mulched and watered frequently during periods of prolonged drought. The rhizomes may be moved successfully at any time during late summer and fall, but the best period is during the months of August, September and October. Since these plants are natives of bogs and swamps, growing naturally in water, they may also be used effectively around the borders of shallow streams and pools. The graceful flowers are very effective in making arrangements or they may be used in a corsage.

The group of plants which are collectively classed as "Louisiana Irises" is composed of three principal species and their hybrids. The species are *I. fulva*, the red or flame colored iris of the Lower Mississippi Valley; *I. giganticaerulea*, the tall blue of the Lower Gulf Coast; and *I. foliosa*, the little blue to lavender dwarf of the bluff or terrace lands. *Iris virginica* is also native to Louisiana, but it grows in other regions outside the state and it does not hybridize with the other species. It is largely found growing in the poorer pine flatlands.

Shipping period for Louisiana irises: Mid August through October.

ABBEVILLE RED (Collected)—The "super-fulva" from the region of Abbeville, Louisiana in various shades of red to terra cotta	\$0.50
ABBEVILLE YELLOW (Collected)—Beige yellow mutation of Abbeville Red	\$0.50
ACCENTS DARK (MacMillan)—Dark red classed as "Wild Astor" with flaring form	\$1.00
ALINE MARTIN (Arceneaux 1947)—Clear yellow self with green style arms	\$1.50
AUTUMN LIGHTS (MacMillan 1950)—Mixture of violet to red on gold background	\$1.00
AVOYELLES (Davis)—Red violet with 5" flowers. Resistant to rust	\$0.75
BARATARIA BAY (Davis 1959)—6" flowers of light violet with yellow line at crest. Standards a lighter shade. Vigorous and rust free. 32" scapes	\$0.75
BARBARA ELAINE TAYLOR (Taylor 1954)—Collected white. A 6" flower with wonderful substance and an ivory glow when open. H.M., AIS, 1955	\$1.50
BAYOU CHOCTAW (Davis 1954)—Red orange bitone with ruby standards and canyon red falls. Seedling of 'Cherry Bounce'	\$0.75
BAYOU DUCHESS (Holleyman 1952)—Light grayish blue self of <i>I. giganticaerulea</i>	\$0.50
BAYOU GLORY (Conger 1952)—Wide, overlapping segments of rose and pink. Bright yellow signal patch. 30". Midseason. H.M., AIS, 1953	\$1.50
BAYOU GOULA (Davis)—5" flowers of deep blue violet with a large triangular crest of aureolin yellow. 28". (<i>I. foliosa</i> hybrid × 'Starry Night')	\$0.75
BAYOU SUNSET (MacMillan 1945)—Soft rose with radiating gold crest. 7" flowers. One of the most popular varieties. "Mary Swords Debaillon Award," 1949; H.M., AIS, 1950	\$0.75
BEAU GESTE (Davis 1954)—Heavily veined violet blue of great vigor and resistance to rust. (<i>Iris giganticaerulea</i> × 'Haile Selassie')	\$1.00
BECKIE (Hamner)—Attractive and free flowering pink of medium size. 24"	\$0.75
BELLE HELENE (Mertzweiller 1958)—Fine reddish purple with several short, radiating lines of chrome yellow at the crest. Large, flat flowers with broad falls. Very vigorous. ('Peggy Mac' × collected <i>I. foliosa</i> hybrid)	\$1.25
BETTE LEE (Davis, V. L., 1951)—Neatly tailored white with green styles	\$0.75
BIENVILLE (Davis 1958)—Lavender self with red purple veining and prominent gold line at the crest. Frequently, four 6½" flowers will be open at one time on the 46" scape. Vigorous, hardy plant	\$0.75
BIG WOODS PURPLE (Davis 1953)—Tall, vigorous purple with a prominent crest markings of chartreuse in a light field.	\$0.50
BLACKOUT (Davis)—Royal red purple with deep purple veining and a gold crest. The 5" flowers are borne on 34" scapes	\$0.50
BLUE CHIP (Smith 1950)—6" flowers of hyacinth blue with the form of 'Peggy Mac.' H.M., AIS, 1951; Mary Swords Debaillon Award, AIS, 1957	\$1.50
BLACK WIDOW (MacMillan 1953)—Huge black-red blooms with wide segments. Strong scapes and vigorous grower. H. M., AIS, 1959	\$5.00
BLUE SKIES (Davis)—Tall, soft blue. Large flowers and vigorous plant	\$0.50
BONNE IDEE (Davis 1958)—Rosy pink described as "Thistle." Prominent "burning bush" crest of sunflower yellow. Standards erect and falls held horizontally on 6" flowers of excellent substance.	\$1.50
BONNET CARRE (Davis 1959)—Violet blue, 5½" flowers with standards of Roman purple and falls of prunella violet. Prominent chrome yellow steeple crest	\$1.00

BORDEAUX BEAUTY (Dormon)—Large, dark red, heavily veined with darker red lines. Chartreuse "burning bush" crest marking	\$1.50
BOY BLUE (Davis 1953)—Vatican purple self. 24". (I. foliosa × I. fulva) × "Starry Night"	\$0.50
BRANDYWINE (Holleyman 1952)—Bitone of amber and rose red	\$1.00
BRIAR PATCH (Collected)—White Iris foliosa with a pale blue overcast and yellow crest marking. Should be hardy in cold climate	\$0.75
CADDO (Trichell 1950)—Red bronze with a very large golden crest. H. M., AIS, 1950; Mary Swords Debaillon Award, AIS, 1950	\$0.75
CAJAN JOYEUSE (Thomas 1942)—A very dependable rosy pink bitone.....	\$0.50
CAROL JUDICE (Davis 1954)—Orchid pink with crest line of chrome yellow. Numerous 5" flowers with broad, erect standards and horizontal falls.....	\$0.75
CATHEDRAL BLUE (Dormon 1945)—Low growing, deep blue with a bold orange crest	\$0.50
CHALMETTE (Davis 1958)—Light purple with a crest of a single chartreuse line in a radiating light field. Large, bell-shaped flowers with a 7" spread and very wide, overlapping falls. (Collected purple × 'Peggy Mac') H. M., AIS, 1959.....	\$1.00
CHERRY BOUNCE (Nelson 1952)—Bright, wild cherry red self with a brilliant luster. Large flowers of superior substance. ('Breeders' Red' × 'Contrast') H. M., AIS, 1950; Mary Swords Debaillon Award, AIS, 1951	\$1.50
CHRYSOPHOENICIA (Small 1929)—Purple with radiating lines at the crest. A vigorous and dependable variety which should be in every collection	\$0.50
CONTESTANT (Davis 1954)—Violet bitone of Concord purple. Crest marked dandelion yellow. 28". Suitable for cold climate. ('Old Creole' × I. foliosa hybrid)	\$0.75
CONTRAST (Debaillon 1943)—Collected by O. F. R. Bruce near New Orleans. Bicolor with pale orchid standards and violet falls.	\$1.00
CORAL BELL (Davis 1959)—Large, light red violet flower with 6½" spread. Chrome yellow line at crest. A free blooming, vigorous plant	\$1.00
CREOLE BELLE (Holleyman)—Tall, deep blue. A large and very fine clone of Iris giganticaerulea collected in the Cameron Parish marshes	\$0.75
CREOLE CAN-CAN (Granger 1956)—A true double. Large, attractive blue flowers on a vigorous plant	\$2.50
CRUSHED GRAPE (Richard)—Light wine purple on a vigorous, healthy plant..	\$0.50
DAINTY LASS (Dormon 1953)—A fuchsia toned rose pink self	\$1.00
DIXIE DEB (Chowning 1950)—Large, clear sulphur yellow of distinctive form, heavy substance and fine lasting qualities. Strong, well branched stalks with several flowers open at one time. Vigorous and early with a long period of bloom. An excellent variety. H. M., AIS, 1956	\$2.00
DORA DEY (Arny 1957)—Large, light purple. Very broad falls with prominent gold crest. Extremely vigorous grower. H. M., AIS, 1957	\$1.00
ECLIPSE (Davis 1959)—Large red violet. Gold steeple crest. Flower full and flat. Plant vigorous, floriferous and rust resistant. Well branched, 36" scapes	\$0.75
EDITH DUPRE (Arceneaux 1945)—Rose and yellow blend. (Bazeti × 'Maringouin Yellow')	\$0.75
ELIZABETH THE QUEEN (Nelson)—Large, pale powder blue to lavender	\$0.75
FLAT TOP (Davis 1953)—Large, full, flat flower similar in form to 'Peggy Mac', but in a pale wistaria violet, heavily veined columbine blue. 24"	\$1.00
GAY DECEIVER (Clark 1950)—Lavender pink with radiating veins of deep rose pink. Bright yellow crest. A beautiful and very satisfactory iris	\$1.25
GEISHA GIRL (Davis 1959)—Standards of geisha pink and falls light purple, heavily veined. Short, lime yellow line at crest. 5" flowers on 34" scapes. ('Louisiana Delight' × 'Carol Judice')	\$1.50
GHEENS WHITE (Davis 1953)—Large, tall, vigorous white sport of I. giganticaerulea, collected on Gheens Plantation near Raceland, La. Golden yellow marking at crest. Early and dependable. 40"	\$0.75
GRACKEL (Chowning)—Intense blue violet marked at crest with faint gold line. 5½" flowers on 42" scapes	\$0.50
GULF MIST (Levingston)—Very large and vigorous powder blue with long chartreuse line at crest. An outstanding variety collected in the Cameron Parish marsh	\$0.75
HAILE SELASSIE (MacMillan 1943)—Red violet collected near Abbeville, La. One of the outstanding varieties for use in breeding. Beautiful, hardy and vigorous	\$0.50
HELEN SMITH (Arceneaux 1947)—Large, early clear yellow of good form.....	\$0.75
HER HIGHNESS (Levingston 1957)—One of the finest of the collected whites with the large size and vigor of the Cameron Blues. A consistent show winner. Large flowers	

with broad petals and splendid texture. H. M., AIS, 1957; Mary Swords Debaillon Award, AIS, 1959 \$3.00

HIGH HAT (Davis 1953)—Tall, light reddish purple. 6" flowers of excellent substance. Wide falls with gold dagger at crest. Vigorous plant \$0.75

IMPERIALIS (Viosca)—Rich, imperial purple of good substance and great vigor. Very persistent variety in the planting \$0.50

IRIS GIGANTICAERULEA (Small 1929)—The tall iris of the Gulf Marshes, just above brackish water. Large flowers in various shades of blue \$0.50

JAMBALAYA (Davis 1954)—Light violet bitone with huge, 7" flowers. Prominent chrome crest in a light field. Vigorous grower and free bloomer. ('Bayou Sunset' × Abbeville Yellow Fulva) \$0.75

JUENE FILLE (Debaillon-Dormon 1942)—Tall, frilled white. Highly recommended \$0.75

JOE BOY (Richard)—Dusky rose falls and light rose standards. Long chartreuse crest. Broad, overlapping segments on a flat flower \$1.00

JOE-MAC (Richard-MacMillan 1950)—Dark blue purple with a short gold line at the crest. Large flower of good substance. Collected near Abbeville, La. \$0.50

JUST KATE (Davis 1953)—Deep Lobelia blue with light veining. Flowers reflexed. Plant tall and vigorous \$0.50

KISATCHIE (Davis 1958)—Dark, velvety violet with an iridescent luster. Standards of Seville violet and falls of Vatican purple with yellow line at crest. Flat, 5" flowers of excellent substance. Plant vigorous and rust resistant \$0.75

KRAEMER YELLOW (Kraemer 1943)—A clear, bright yellow collected in the Kraemer Bog near Kraemer, La. One of the best of the collected yellows. Early flowering. \$0.75

LA FOURCHE (Davis 1959)—Large, medium toned violet with a 6" spread. Wide falls with a short, chartreuse line at crest. Standards wide and lighter than the falls. Vigorous and free of rust..... \$0.75

LOUISE ARNY (Arny 1956)—Pastel blue to lavender. Orange yellow dagger crest. 5" flower, cupped and ruffled. Four bud positions per scape with 2 buds often at each position. First in class, State Iris Show, 1960. H. M., AIS, 1956..... \$1.00

LOUISE AUSTIN (Arceneaux 1945)—Deep blue. Low growth, but very floriferous. \$0.50

LOUISIANA DAWN (Dormon 1943)—An orchid bicolor. Tall and vigorous..... \$0.50

LOUISIANA DELIGHT (Arceneaux 1950)—Large, clear pink. Vigorous growth... \$0.75

LSU BEAUTY (Ornamental Horticulture, LSU, 1959)—Very fine sweet pea pink with 7" flowers on 38" scapes. Best in pink class and best unregistered iris in the show at 1956 convention and show of Society for Louisiana Irises..... \$2.00

LSU GOLD (Ornamental Horticulture, LSU 1959)—Light chrome-lemon standards with slightly darker falls. Blooms 4½" on 28" scapes..... \$2.00

LSU PURPLE (Ornamental Horticulture, LSU 1959)—Rich purple with 6½" flowers on 42" scapes. Falls marked with a dagger crest of chrome yellow..... \$1.50

LSU TAN (Ornamental Horticulture, LSU 1959)—Colonial buff with 5" flowers on 32" scapes. Best in "Buff to Yellow" class in 1956 state show of Society for Louisiana Irises. Sister seedling of 'LSU Beauty.'..... \$2.00

LSU No. 1 (1952)—Amaranth purple with 5" flowers. Long pencil crest of golden yellow. Falls held horizontally. Substance excellent. 30"..... \$0.75

LSU No. 2 (1952)—Early mauve pink, darker veined. Short line crest..... \$0.75

LSU No. 3 (1952)—Burgundy violet with dark, radiating veins. Crest marked with green line in light yellow field. Large flowers of 'Peggy Mac' type. 34"..... \$0.75

LSU No. 4 (1952)—Large, deep rose pink with small gold crest of 3 irregular lines. Standards a lighter pink. Substance good. 34"..... \$0.75

LSU No. 5 (1952)—Large Bishop blue with greenish-yellow crest of short, radiating lines. Early, free-blooming variety. 34"..... \$0.75

MARY S. DEBAILLON (Dorman 1942)—Showy orchid pink bitone. Very vigorous. First iris to receive the Mary Swords Debaillon Award from A. I. S., 1948..... \$0.50

MIDSHIPMAN (Richard 1950)—Large wistaria violet. Distinct yellow signal surrounded by red violet. Large, flaring form. Very vigorous. H. M., AIS, 1950..... \$0.75

MISS LOUISIANA (Davis 1954)—Tall, deep blue violet with a golden steeple crest. The 5½" flowers have erect standards and horizontally held falls which are 2" wide. Vigorous and rust resistant. ('Haile Selassie' × *I. giganteaerulea*)..... \$0.75

MISTIS (MacMillan 1957)—Large lavender-pink and one of the most beautiful of the pink irises. Winner of Captain Stewart Abbott Award, 1958; H. M., AIS, 1959..... \$5.00

MISTLETOE ROSE (Lambdin)—Medium shade of red violet with long gold steeple crest. Flowers 6" on 32" scapes..... \$0.75

MISTLETOE GARNET (Lambdin)—Deep glowing red with flat flowers which have wide, overlapping segments of excellent substance. \$2.00

MOREHOUSE (Davis 1959)—Ecru seedling of Abbeville Yellow Fulva. Flat flowers with broad segments	\$0.75
NAKATOSH (Trichell 1950)—Dark cygnet red, heavily veined. Prominent gold crest. Falls deep rose with darker midrib. Good bloomer with two to three open flowers at one time. H. M., AIS, 1954.....	\$1.50
NEW OFFERING (Davis 1958)—Large, full flower of dark blue-violet, heavily veined prunella violet. Vigorous and rust resistant. First place in "Blue Class" at state show of Society for Louisiana Irises in 1957, 1960 and 1961. H. M., AIS, 1959.....	\$3.00
OLD CREOLE (Davis 1953)—Tall <i>giganticaerulea</i> blue with white veining. Large flat flower of excellent substance. Vigorous plant. Collected by V. L. Davis near New Orleans, La.	\$0.50
OUACHITA (Davis)—Red seedling of 'Cherry Bounce'. Flat, 5½" flower with reddish purple veins and short line at crest. 36".....	\$0.75
PEGGY MAC (MacMillan)—Magenta rose. Flat flower with broad segments.....	\$0.75
PERIWINKLE (Davis)—Tall, periwinkle blue. Large flowers, blooming early....	\$0.50
PLAQUEMINE (Davis 1958)—Violet blue, 6" flowers with wide falls and a prominent crest of yellow, radiating lines. Vigorous, floriferous and rust resistant.....	\$0.75
PLUM GOOD (Nelson)—An outstanding bright red. Large flowers of firm substance and excellent color fastness.	\$2.00
PSEUDACORUS (Linn. 1753)—Europe)—The wild water iris of Western Europe. Clear chrome yellow self. Two varieties are offered. The tall, rank growing variety of Northern France and Belgium, which is best suited to large estates, and the compact, low growing form from Southern France, which is best for home planting.....	\$0.50
PURPLE LADY (Levingston)—Large, light purple. Wide falls, heavily veined. Grows and blooms well.	\$0.75
PURPLE WATERS (Holleyman)—Tall, vigorous purple with large flowers.....	\$1.00
PURPLE WONDER (MacMillan 1953)—Giant plant and bloom. Dark, rich purple with a gold crest.	\$1.50
REBEL (Davis 1958)—Large, 6" flowers of heavy substance. Havana rose standards, darker veined. Falls canyon reddish brown, darkening around the golden yellow crest. Vigorous plant with strong, erect scapes. A striking and beautiful variety. ('Tiger' × 'The Khan') H. M., AIS, 1960.....	\$3.00
RICHLAND (Davis 1958)—Deep blue violet with 6" flowers. Vigorous, floriferous and rust free. Well branched scapes, 36" to 40".....	\$0.75
ROSE OF ARCADIA (Conger)—Deep shade of "old rose" pink. Broad, flat, 5½" flowers. Petals wide and overlapping. Plant vigorous and free of rust. 36".....	\$1.25
ROYAL GEM (Smith 1947)—Velvety purple with prominent yellow signal patch. Strong grower. Floriferous, with large flowers of splendid substance. A credit to any planting. H. M., AIS, 1951; Mary Swords Debaillon Award, AIS., 1952.....	\$1.50
ROGER DAVIS (Davis)—A rich chocolate tan with a dark brown midstripe in the falls. Wide floral segments of good substance.	\$0.75
ROYAL HIGHNESS (Debaillon-Dormon 1946)—Dark reddish purple self.....	\$1.00
SAINT BERNARD (Davis 1959)—Dark violet with prominent marking at the crest. 6" flowers on 30" scapes. Rust free plant.....	\$0.75
SAUCY MINX (Dormon 1949)—Blend of rose and copper. Ruffled, 5" flowers on 34" scapes. H. M., AIS, 1951; Mary Swords Debaillon Award, AIS, 1954.....	\$1.50
SERENE VITALITY (Davis 1958)—Blue violet with gold line at crest. 5" flowers on heavy zig-zag scapes with some branching. Plant vigorous and healthy.....	\$0.75
SHADOWS (Richard)—Tall, smoky blue. Vigorous, floriferous and early.....	\$0.50
SIR LANCELOT (Davis)—Large, soft blue with long gold lance at crest.....	\$0.50
SOUTHERN SKIES (Davis)—Vigorous, low-growing deep blue. Midseason. (<i>Iris foliosa</i> × <i>I. giganticaerulea</i>). Probably hardy in cold climates.....	\$0.50
STARRY NIGHT (Dormon 1945)—Very dark red purple. Prominent golden yellow crest.	\$0.75
STRUTTING CANARY (MacMillan 1953)—Medium size flowers of the richest golden yellow of any commercial variety of La. iris. A consistent show winner. Grows best in a tub of water in which soil has been placed.....	\$5.00
SUPER RUBRA (Lambdin)—A very large Abbeville Red Fulva. Collected.....	\$0.75
SUSAN CURRY (MacMillan 1956)—Red violet bitone with falls a shade darker than the standards. 30".	\$2.00
TALL TIMBER (Davis 1954)—Large red violet self with 6" flowers. Vigorous and highly rust resistant. (Abbeville Red Fulva × <i>I. giganticaerulea</i>).....	\$0.50
TENSAS (Davis)—Bitone with dark red violet falls and standards of blue violet. Promi-	

nent, radiating crest of rich orange. 5½" flowers on 40" scapes. Vigorous and rust free plant.	\$0.50
THE KHAN (Dorman 1949)—Velvety black-violet flowers of amazing size and substance. Huge, golden orange signal patch. 7" flowers on 30" scapes. Vigorous and rust resistant plant. H. M., AIS, 1951; Mary Swords Debaillon Award, 1955.....	\$2.00
TOM TINKER (Richard)—Deep blue of fine form with a rich orange line crest.	\$1.00
TRIXIE (Davis, V. L. 1959)—Tall, vigorous pale blue changing to near white as the flower ages. Large flowers of heavy substance. Collected in the Cameron Marsh.	\$1.00
UPSTART (Dormon 1951)—Light crimson self with bright yellow signal. H. M., AIS, 1956.	\$1.50
VERMILION (Davis)—Dark red, heavily veined, flat flower with 6" spread. Substance good. Seedling of 'Cherry Bounce'. 38".....	\$0.75
VINEYARD (Debaillon-Dormon 1944)—A very large blend of Burgundy, port and Bordeaux.	\$0.75
VINICOLOR (Small 1927)—Tall, vigorous reddish purple.....	\$0.50
VIOLET RAY (Dormon 1950)—Huge, pansy purple with creamy white rays. Wide falls and gracefully twisted standards. Vigorous plant, resistant to rust. A magnificent iris. H. M., AIS, 1951; Mary Swords Debaillon Award, AIS, 1953	\$2.00
VIOLIPURPUREA (Small 1929)—An interesting dark purple. A collector's item, first found in Terrebonne Parish, La., by Dr. John K. Small.....	\$0.50
WHEELHORSE (Dormon 1952)—Huge rose bitone with rose pink standards and amaranth rose falls. Consistent winner in state iris shows. ('Rose of Abbeville' × 'Violet Ray'). This large flower carries a recessive yellow in its genetic composition. When crossed with yellow varieties some of the seedlings are very large, clear yellow. H. M., 1955; Mary Swords Debaillon Award, AIS, 1958.....	\$4.00
WHISTLE BAIT (MacMillan 1953)— Bicolor with standards of medium red violet and falls of aureolin yellow. ('Bayou Sunset' × unknown).....	\$0.75
WOOD VIOLET (Dormon, R. 1943)—Low growing, intense blue violet with a yellow line crest. 24". H. M., AIS, 1951; Mary Swords Debaillon Award, AIS, 1956.....	\$1.25
YELLOW SUNSET (Davis 1953)—5" flower of rubescent color, darker veined. Segments greenish yellow on the reverse side. Crest marked with five radiating lines of goldenrod yellow. ('Abbeville Yellow' × 'Bayou Sunset').....	\$0.75

GARDEN COLLECTION OF UNLABELED RHIZOMES OF LOUISIANA IRISES IN SHADES OF RED, BLUE AND PURPLE.

Per dozen	\$3.00	Per 100	\$15.00
-----------------	--------	---------------	---------

VIRGINICA GROUP

All iris varieties of the Virginica Group are very vigorous, free of disease and easy to grow. They will grow on poorer soil and will withstand more cold and more drought than the species and hybrids, which taken collectively, are called "Louisiana Irises." Even this group of irises, however, will respond to good soil and water as needed.

BLUE GIANT (Davis)—Large blue collected near Lake Charles, Louisiana.....	\$0.50
CALICO PINK (Murrell 1954)—Bright pink. Large and vigorous plant.....	\$1.50
CAROLINIANA (Wats. 1898)—Blue with dark purple stems. Large flowers.....	\$0.50
GIANT WHITE —Large white flowers. Collected near Lake Charles, La.....	\$0.50
LAVENDER-PINK (Murrell)—A very fine clone with lavender-pink flowers.....	\$0.50
MISS LAKE CHARLES (Levingston)—Large and vigorous bicolor of ultramarine blue. Foliage gracefully curved.	\$0.75
VIRGINICA ALBA (Collected by Connell)—Free-blooming white. Smaller than 'Giant White.' Found in southeast Louisiana.	\$0.75

JAPANESE IRIS

These fibrous rooted irises will do well on the fairly heavy soils of the South provided they are given a fertile soil, high in organic matter and watered frequently before and during the blooming period. In the area of Baton Rouge, La., they bloom in late May and early June. They need an acid soil, free of lime. They are well suited to planting along the banks of ponds and streams, but will grow in high ground. The

magnificent flowers are not for the impatient gardener as they usually do not bloom until the second year after fall planting.

If thrips attack the blooms they can be controlled by spraying the plants with water soluble DDT.

DOUBLE PURPLE—A very fine named variety, the identity of which has been lost. (Shipped only in November). \$1.00

SIBERIAN IRIS

The Siberians need the same soil and culture as the Japanese Irises. They bloom earlier and make small flowers on wiry stems. Fine both for cutting and for landscape effect.

- CAESAR**—Dark blue purple \$0.75
- CAESAR'S BROTHER**—Tall, handsome pansy-purple..... \$0.75
- COOL SPRING**—Clear, pearly blue. \$1.00
- ERIC THE RED**—Large, broad petaled flowers of wine red..... \$1.50
- PERRY BLUE**—Clear sky-blue. A dependable old favorite. \$0.75
- TYCOON**—Very large violet blue flowers with broad petals..... \$1.25
- SNOW QUEEN**—White with yellow crest marking. Low growth..... \$0.75
- UNLABELED BLUE PURPLE**—The identity of these plants has been lost.....\$0.50

NOTE: Siberian and Japanese irises are shipped only in November. If the total order for these two groups of plants is less than \$5.00, please add 35¢ for postage.

THE AMERICAN IRIS SOCIETY

Membership in the AIS gives you (1) a classification system for all types of irises, (2) a registration system for named varieties, (3) an awards program to give recognition to outstanding varieties, (4) a research program to find solutions to cultural problems, (5) a publications program, including the quarterly Bulletin, (6) an exhibitions program to assist groups in planning shows and exhibits, (7) a slides program with educational material, (8) a "Robin" program for the exchange of ideas and experiences, and (9) programs of regional and national activities. Send dues of \$5.00 per year to:

Mr. Clifford W. Benson, Secretary
2237 Tower Grove Blvd.,
St. Louis 10, Mo.

DAYLILIES

These plants may be moved at any time of the year when the ground is not frozen, but the most desirable season in the South is in late summer and early fall after blooming is over. Fall set plants will flower the following spring.

Daylilies will tolerate a great deal of neglect and will live and bloom on poor soil, but for more and larger flowers and a longer blooming period it is desirable that they have a fertile soil, good culture and water as needed during the periods of drought.

Diseases are of negligible importance, but in recent years there have been instances of foliage damage by red spiders and both the foliage and flower buds are frequently injured by aphids (plant lice). Both of these pests may be controlled by a weekly spray program, beginning in late winter. Malathion is effective when used at the rate of one tablespoonful to a gallon of water and applied directly on the insects. At this nursery it has been found that one early spraying with the systemic material "Systox" gives almost complete control of the aphid *Myzus hemerocallis*, but it is toxic to humans and the careless use by inexperienced operators is not recommended.

In the late winter of 1961 complete control of aphids was effected by one treatment with the granular systemic, "Di-Syston," using 4 ounces of 10% active material to 100 feet of row. The material is shaken over the daylily plants, using a tall fruit juice can with nail holes punched in the bottom and a cloth tied over the top of the can. This insecticide is taken up by the plants through both the foliage and the roots. It may be purchased at the 10% strength in 50 pound drums from COTTON STATES CHEMICAL

COMPANY, P. O. Drawer 677, West Monroe, Louisiana. Growers in a locality might persuade their local seed store to purchase a drum and package it in small containers for garden use.

Key to descriptive symbols used:

Numerals—Scape height in inches.	Re.—Remontant or reblooms
Ev.—Evergreen	J. C.—Junior Citation
De.—Deciduous or dormant in winter	H. M.—Honorable Mention
Semi-ev.—Partly or only briefly dormant	A. M.—Award of Merit
Stout Medal—The highest honor awarded	

SHIPPING PERIOD: September through April. No shipments during the hot weather of June, July and August.

ACRES OF GOLD (Russell 1946)—36" Ev. Re.—Medium tone yellow. Sunfast....	\$0.50
ADONIS (Connell 1952)—28" De.—Salmon pink. Broad, overlapping segments....	\$2.00
ADELAIDE NIELAND (Taylor 1955) 38" Ev. Re.—Persian lilac. Wide, ruffled segments on sunfast flowers. Vigorous plant. J. C., 1954; H. M., 1955.....	\$2.00
AFTERGLOW (Stout 1941)—36" De.—Soft buff with rose tint in throat.....	\$0.50
ALBATROSS (Bach 1954)—44" De.—Very light yellow. Sunfast.....	\$1.00
ALBION (Wheeler 1952)—38" Ev. Re.—Light lemon yellow. White pollen.....	\$1.00
AMBER FLAME (Stevens 1956)—40" De.—Huge, triangular buff-apricot self....	\$1.00
AMHERST (Wheeler 1946)—42" Ev. Re.—Sunfast purple. H. M., 1950; A. M., 1952.	\$0.50
ANGELICA (Connell 1952)—36" Ev. Re.—6" yellow flowers with broad segments.	\$1.00
ANN BURRIS (Davis, C. W. 1956)—42" Ev.—Bicolor with 6" sunfast flowers of Bois de Rose and Aureolin yellow. Strong, erect scapes on vigorous plant.....	\$1.00
ANNIE OAKLEY (Wheeler 1954)—36" Ev. Re.—Reverse bicolor on buff. Red halo.	\$0.50

ARLA (Wheeler 1951)—42" Ev. Re.—Light canary yellow. Sunfast. H. M., 1954...	\$0.50
ASIATIC (Davis, C. W. 1953)—24" Ev. Re.—Semi-dwarf bicolor.....	\$0.50
ATHLONE (Russell 1942)—44" Ev. Re.—Large bicolor. A. M., 1952.....	\$0.50
AUTUMN GOLD (Sutton 1952)—34" Ev.—Large golden yellow with wide, overlapping segments. Scapes strong. Early bloomer.....	\$2.00
BABETTE (Hayward 1947)—28" Ev. Re.—Semi-dwarf, small orange yellow.....	\$0.50
BACCHUS (Wheeler 1950)—32" Ev. Re.—Raspberry, Green canary throat.....	\$1.00
BAGGETTE (Russell 1945)—34" De. Re.—Yellow and rose bicolor. A. M., 1952....	\$0.50
BARONET (Stout 1941)—34" Ev. Re.—Orange red, sunfast flowers.....	\$0.50
BEGGAR'S CRUMB (Spalding 1956)—32" Ev. Re.—Mars orange with garnet brown halo. 6" flowers of heavy substance. Strong, well branched scapes.....	\$2.00
BELLE OF GEORGIA (Russell 1943)—36" De.—Sunfast peach. Floriferous....	\$0.50
BEN HAGER (Davis, W. B. 1955)—36" Ev. Re.—Very large dark red with wide segments. 7" flowers on strong, well-branched scapes.....	\$5.00
BERTRAND FARR (Stout 1941)—36" Ev. De.—Light orange red. A. M., 1951....	\$0.50
BESS ROSS (Claar 1951)—36" Semi-ev. Re.—Vivid red with velvety texture and iridescent luster. Wide-open, beautiful flowers. H. M., 1955; A. M., 1958.....	\$4.00
BESS VESTAL (House 1949)—40" Ev. Re.—Large, bright red. H. M., 1952.....	\$0.50
BETSY B (Vestal 1952)—28" Ev. Re.—Brilliant, sunfast red. H. M., 1955.....	\$0.50
BETTY SOUDERS (Alexander 1956)—34" Ev. Re.—Large, sunfast gold.....	\$2.00
BIG SHOT (Pumphrey 1955)—42" Ev. Re.—Golden yellow, 8" flowers. Sunfast, early bloomer.	\$1.00
BILL WOOD (Wood 1950)—44" De.—Bright red self. Wide-spread, sunfast flowers.	\$1.00
BLACK PRINCE (Russell 1942)—42" De.—Dark, black red. A. M., 1951.....	\$0.50
BLANCHE HOOKER (Stout 1946)—36" Ev. Re.—Early red. H. M., 1950; A. M., 1954.	\$0.50
BLONDE BUTTERFLY (Slaughter 1955)—36" Ev. Re.—Pale yellow with wide, rounded petals. Sunfast, 5" blooms remain open into the night. Strong scapes.....	\$2.00
BLUE DANUBE (Lester 1955)—34" De.—Near approach to blue. Segments wide and substance good. Strong, well branched scapes.	\$2.00
BLUE HORIZON (Connell 1952)—36" Ev.—Large magenta, tinted blue.....	\$1.00
BLUSHING BEAUTY (Taylor 1956)—36" Ev. Re.—Clear rose pink of medium size. Well branched, strong scapes. Sunfast flowers.	\$1.50
BOBOLINK (Wheeler 1946)—45" Ev. Re.—Garnet purple and yellow bicolor.....	\$0.50
BOLD BOY (Davis, C. W. 1953)—40" Ev. Re.—6" bicolor. Maroon and yellow....	\$0.50
BOUTONNIERE (Stout 1939)—36" De.—Small, red orange polychrome.....	\$0.50

BRACKEL (Wheeler 1943)—32" Ev. Re.—Large mahogany and tan.....	\$0.50
BRANDYWINE (Wheeler 1948)—34" Ev.—Garnet mahogany.	\$0.50
BRIGHT DANCER (Spalding 1956)—38" Semi-ev. Re.—Sunfast, bright red.....	\$2.00
BRIGHT TAYLOR (Bass 1955)—42" Ev. Re.—Clear, velvety red, sunfast flowers. Good branching. J. C., 1954; H. M., 1955.	\$3.00
BROCADE (Taylor 1949)—38" Ev. Re.—Amber rose with darker veining. Sunfast flowers on strong, well branched scapes. H. M., 1953; A. M., 1956.....	\$0.50
BRULEE (Taylor 1950)—36" Ev. Re.—Cream with green tint in throat. Wide petals with satiny luster. Extended bloomer. H. M., 1953.....	\$1.50
BRICE CANYON (Kraus 1952)—36" Ev.—Large, well formed flowers of buff apricot, with a light, rosy eyezone.	\$2.00
BUTTERCUP LANE (Sass 1955)—40" De.—Fragrant, buttercup yellow self. Lower part of flower is trumpet shaped with upper half flaring. Good branching.....	\$3.00
BUTTERSCOTCH (Sass 1955)—40" Semi-ev.—Buff yellow with big green throat. Wide-open flowers which face to the side. Fragrant. J. C., 1954; H. M., 1955.....	\$3.00
CABALLERO (Stout 1941)—36" Ev.—Vermilion and yellow bicolor. A. M., 1951...	\$0.50
CALUMET (Kraus 1952)—28" De.—Large, wide-petaled, bright coppery orange, deeper veined.	\$1.00
CAPTAIN RUSSELL (Russell 1956)—36" De. Re.—A magnificent bicolor of lavender and ivory. Profuse bloomer. Sunfast, 6" flowers. J. C., 1955; H. M., 1956.....	\$3.00
CARAMEL CRISP (Davis, C. W. 1952)—40" Ev. Re.—Caramel and yellow.....	\$0.50
CARDINALIS (Davis, C. W. 1957)—28" Ev.—Wild strawberry red with chartreuse throat. Sunfast, 5" flowers, blooming over a long period.....	\$1.00
CARMEL (Slaughter 1955)—36" Ev. Re.—The 7" flowers have wide, yellow petals, over-cast tan, and light yellow sepals. Sunfast. Strong, well branched scapes.....	\$1.00
CAROLYN KIDD (Clark 1953)—30" Ev. Re.—Early apricot pink. Sunfast.....	\$0.50
CATHAY (Stout 1949)—38" Ev.—Brilliant scarlet red. Good substance.....	\$0.50
CATHEDRAL TOWERS (Milliken 1948)—34" Ev.—Soft, rich yellow with a bold, reddish brown halo. Completely sunfast. H. M., 1951; A. M., 1954.....	\$1.00
CELLINI (Wheeler 1949)—36" Ev. Re.—Amaryllis shaped canary yellow. A. M., 1955.	\$0.50
CENTURIAN (Stevens 1956)—40" Eemi-ev.—Bright warm red. Floriferous, well branched scapes. J. C., 1955; H. M., 1956.....	\$1.50
CERISE (Wheeler 1948)—48" Ev.—Rose crimson. H. M., 1950; A. M., 1954.....	\$0.50
CHAMPAGNE (Davis, C. W. 1952)—44" Ev. Re.—5" coppery pink. Sunfast.....	\$0.50
CHEROKEE ROSE (Lester 1955)—36" Ev.—5" flowers of deep rose, becoming lighter at the end of the day. Sunfast. Lime green throat. H. M., 1956.....	\$1.00
CIBOLA (Hill 1950)—36" De. Re.—Large light yellow-orange or melon color. H. M., 1953; A. M., 1956.	\$1.00
CINNABAR (Stout 1930)—35" Ev.—Medium orange polychrome. Veined.	\$0.50
CITATION (Taylor 1952)—38" Ev. Re.—Glowing lacquer red which makes a fine garden show. Sunfast flowers on a vigorous plant. H. M., 1954.....	\$2.00
CLAAR No. 17 (Claar)—34" Ev.—Soft, creamy pink of medium size. Sunfast....	\$1.00
COEUR DE LION (Connell 1952)—34" Ev. Re.—Big golden yellow.....	\$1.00
COLONEL JOE (Lester 1951)—36" De. Re.—Popular, large pale yellow. Sunfast flowers remain open after dark. H. M., 1953; A. M., 1956.....	\$2.00
COMET (Russell 1943)—36" De. Re.—Large bicolor. Rose salmon and yellow....	\$0.50
CONFIDENCE (Baker 1956)—36" Semi-ev.—Broad salmon-peach flowers with greenish throat. Strong grower with good scapes. Sunfast.	\$2.50
CONVOY (Sass 1953)—36" De.—Red purple. Floriferous and fragrant.	\$1.00
COOL SPRINGS (Davis, C. W. 1959)—32" Ev. Re.—Cool, light yellow with deep, apple-green throat. 5" flowers on strong scapes. Sunfast blooms are creped and fluted with segments recurving at the tips.	\$10.00
COPPER COLONEL (Sass 1948)—40" De. Re.—Hays russet petals and yellow sepals. Large flowers with greenish throat. H. M., 1951; A. M., 1954.	\$1.50
CORNELL (Wheeler 1950)—38" Ev. Re.—Crimson and yellow bicolor.....	\$0.50
CORONATION ROBE (Davis, C. W. 1956)—38-42" Ev. Re.—Rich reddish purple self. Large, well formed flowers. Sunfast. Scapes strong and well branched.....	\$1.00
COSETTE (Milliken 1953)—36" Ev. Re.—Soft yellow with rosy dusting. Sunfast flowers with broad, ruffled petals. H. M., 1955; A. M., 1958.....	\$1.00
CRADLE SONG (Milliken 1953)—32" Ev. Re.—Large gold, opening in the afternoon and lasting through next day. Well branched scapes. H. M., 1955; A. M., 1959.....	\$1.00
CREPE DE CHINE (Davis, C. W. 1954)—42" Ev. Re.—Early chrome yellow. Large, creped flowers faintly dusted maroon at eyezone. Sunfast. Strong scapes.....	\$0.50

CRIMSON STAR (Douglas 1950)—38" Semi-ev.—Medium large, sunfast flowers of deep crimson. Strong, erect scapes. Vigorous growth. H. M., 1952.....	\$0.50
CRINOLINE (Taylor 1955)—32" Ev. Re.—A beautiful pink. Well formed, medium size flowers of good substance and green throat. J. C., 1954; H. M., 1955.....	\$3.00
DAAFU (Claar 1955)—24" De.—Deep rose pink with a frosty sheen and a deeper rose-red banding. Sunfast flowers of excellent texture. H. M., 1957.....	\$1.50
DAISY CLARK (Davis, C. W. 1952)—42" Ev. Re.—Large Algerian red.....	\$0.75
DAMASCUS (Saxon 1952)—42" Semi-ev.—Large salmon pink, heavily veined.....	\$1.50
DARK SECRET (Connell 1952)—34" Ev. Re.—Large, dark velvety-red self.....	\$1.25
DAUNTLESS (Stout 1936)—34" Ev. Re.—Large, sunfast cadmium yellow. Stout Medal, 1954.	\$0.50
DAWN PINK (Kraus 1955)—36" De.—Wide flaring Azalea pink veined Jasper red. Well formed, ruffled flowers of good texture.	\$1.50
DEMI-TASSE (Wheeler 1948)—24" Ev.—Dwarf bicolor of garnet and gold.....	\$0.50
DIADEM (Wheeler 1953)—36" Ev. Re.—Superior bicolor of salmon-pink and yellow. Wide, frilled petals on sunfast flowers. Strong, well branched scapes.....	\$0.75
DIXIE (Fisher-Gillespie 1955)—36" Ev. Re.—Light yellow. Medium size, fragrant blooms of excellent substance.	\$0.75
DOROTHEA (Lester 1948)—34" De.—Bicolor of light yellow and pale lilac. Heliotrope halo. Sunfast flowers. H. M., 1951; A. M., 1954.	\$0.75
DUCHESS OF WINDSOR (Traub-Haywood 1939)—34" Ev. Re.—Cream yellow and rose.	\$0.50
DUNCAN (Wheeler 1943)—44" Ev.—Early 6" maroon red.	\$0.50
DUNA (Taylor 1953)—38" Ev. Re.—Large, sunfast chimney-red.....	\$0.75
EARLY BIRD (Lester 1950)—30" Ev. Re.—Early blooming, 6" pale yellow with cream midrib. Remains open almost 24 hours.	\$1.00
EASTER MORN (Wheeler 1944)—42" Ev. Re.—Wide segments of buff yellow dusted rose at the eyezone. Well branched and free flowering. A. M., 1951.....	\$0.75
EASTER SUNRISE (Schmelzer 1954)—36" De.—Light golden yellow overlaid deep pink. Green throat. Large, full flowers, creped and slightly twisted.	\$0.75
EDWARD VII (Connell 1952)—28" Ev.—Majestic gold self of very large size and superior form and substance.	\$1.00
ENVY (Farris 1957)—30" Ev.—Very large greenish yellow self with a green throat. Substance good. Strong, well branched scapes. Good of evenings.	\$3.00
ERASMUS (Connell 1953)—34" Ev.—Full, compact flower of dark, glowing red..	\$1.50

PINK GLAZE (Craig 1955)—36" Ev. Re.—Deep rosy pink. Chartreuse throat.....	\$0.75
PINK INTERLUDE (Nesmith 1954)—40" De.—Clear bright pink self with cool green throat. Strong, well branched scapes. The fresh color is unfading.....	\$1.00
PINK OPAL (Carpenter 1952)—36" De.—Large flowers of smooth, opal pink. Scapes strong. Vigorous growth and rapid increase.....	\$1.00
PINK PETTICOATS (Nesmith 1949)—44" De.—Ruffled blooms of coral pink.....	\$0.75
PINK PRELUDE (Nesmith 1950)—39" Semi-ev.—Large and lovely dawn pink self. Sunfast flowers on strong scapes. H. M., 1952; A. M., 1955.....	\$2.00
PINK RADIANCE (Douglas 1949)—40" De.—Geranium pink with deeper halo. Broad and full, sunfast flowers on strong scapes. H. M., 1952.....	\$1.25
PINK SATIN (Bach 1953)—38" Semi-ev.—Clear, lavender pink. Sunfast.....	\$0.75
PINK SONG (Hall 1956)—32" Semi-ev.—A silvery pink of good form. Well branched, with numerous flower buds. Substance good.	\$2.00

PLAYBOY (Wheeler 1956)—34" Ev.—Deep golden yellow self. Large, ruffled flowers of beautiful form. Excellent branching. Sunfast. J. C., 1954; H. M., 1955; A. M., 1958; American Home Achievement Award, 1955.	\$6.00
PLUM GOOD (Baker, S. H. 1957)—36" Ev. Re.—Light plum purple self which is also "plumb good." Medium large flowers with wide segments. Good substance.....	\$3.00
PLUM MIST (Claar-Parry 1948)—40" De. Re.—Large, fully open flowers of plum color. H. M., 1952.	\$1.50
PORCELAIN ROSE (Kraus 1955)—28" Semi-ev.—Very free flowering, clear porcelain rose or rose self. The recurved segments have slightly ruffled edges.....	\$4.00
PORT (Stout 1941)—30" De.—Small, sprightly red with a green throat.....	\$0.50
POTENTATE (Nesmith 1943)—38" De. Re.—Pansy purple with a satiny sheen. Sunfast flowers on strong, erect scapes. A. M., 1950; Stout Medal, 1952.....	\$0.75
POWDER PUFF (Lester 1952)—36" De. Re.—Pastel yellow with a touch of pink which deepens in the 5" flower after a long, sunny day. Cool, green throat.....	\$1.00
PRETTY BUTTERFLY (Sutton 1955)—34" Ev.—Large, copper tinted flowers marked with a darker eye. Good of evenings. Early flowering.	\$1.25
PRIMA DONNA (Taylor 1946)—38" Ev. Re.—Popular peach colored flower with wide segments. Large, sunfast blooms. Proliferates heavily. A favorite every year since introduction. H. M., 1950; A. M., 1952; Stout Medal, 1955.....	\$1.25
PURPLE DOT (Davis, C. W. 1957)—26" De. Re.—A mass of purple loveliness. Small, dark, red-purple flowers on well branched, low, erect scapes. Segments frilled and overlapping. Flowers completely sunfast.	\$1.25
QUEEN OF GONZALES (Russell 1938)—38" Ev.—Large, early gold.....	\$0.50
QUEEN OF MAY (Van Veen 1910)—40" Ev. Re.—Early light yellow.....	\$0.50
QUINCY (Taylor 1955)—36" Ev.—A large and beautiful flower. Soft peach pink with a green throat which is completely surrounded by a halo of reddish purple. J. C., 1953; H. M., 1955; A. M., 1958.....	\$4.00
RAJAH (Stout 1935)—36" De. Re.—English red with dark red halo.....	\$0.50
RAVEN (Wheeler 1951)—40" Ev. Re.—Dark velvety red. The black sheen gives a fine contrast to the chartreuse throat. Sunfast. H. M., 1953; A. M., 1956.....	\$1.25
RED ROVER (Davis, C. W. 1954)—42" Ev.—5", bright red, sunfast blooms.....	\$0.75
REVELATION (Baker, S. H. 1955)—32" Ev.—The best brown daylily. Widespread, ruffled flowers of rich cinnamon. Wide petals on sunfast flowers which remain open late in the evening.	\$3.00
REVOLUTE (Sass 1944)—44" De. Re.—A very fine light yellow self of good form. Well branched scapes. Extended blooming. A. M., 1950; Stout Medal, 1953.....	\$1.25
RINGLETS (Kraus 1950)—34" De.—Numerous small flowers, creped and ruffled, in a bright golden yellow. Sunfast. H. M., 1955; A.M., 1958.....	\$1.25
ROYAL TOGA (Register 1951)—42" Ev.—Dark royal purple with a light green throat. Large flowers of heavy texture. Stays open of evenings. Sunfast.	\$0.75
RUFFLED PINAFORE (Milliken 1948)—40" Ev. Re.—Warm apricot yellow with broad, overlapping segments. Wide petals, crinkled on the edges. Throat green with rosy halo. Sunfast flowers. H. M., 1951; A. M. 1954; Stout Medal, 1957	\$1.00
SACHEM (Stout 1941)—42" Ev. Re.—Clear dark red of good substance.....	\$0.50
SAINT NICHOLAS (Connell 1952)—34" Ev.—A broad petaled, deep yellow, ruffled and fluted and with a maroon halo.	\$1.00
SALLY O'NEAL (Taylor 1948)—38" Ev. Re.—Large pale yellow. Up-facing.....	\$0.75
SALMON SHEEN (Taylor 1950)—34" Ev. Re.—Veined salmon pink. A. M., 1956; Stout Medal, 1959.	\$1.00
SAMARKAND (Stevens 1953)—30" De.—Red suffused over gold. Broad segments and large flowers with green-gold throat. Well branched scapes.....	\$2.00
SCARLET SUNSET (Wheeler 1947)—36" Ev. Re.—Brilliant scarlet. A. M., 1953... ..	\$0.50
SELAH (Schmelzer 1953)—48" De.—Medium shade of sunfast golden yellow.....	\$1.00
SEMAPHORE (Connell 1954)—34" Ev.—Dark, rich red of smooth texture and heavy substance. Wide, overlapping segments on sunfast flowers.....	\$2.00
SEMINOLE CHIEF (Lester 1947)—42" De.—Cherry red on strong scapes.....	\$0.50
SHANNON (Davis, C. W. 1959)—36" Ev. Re.—Superior light yellow. The big 7" flower has a light greenish tint and a green throat. Upfacing and sunfast. (Verilite × Autauga).	\$10.00
SHOWER OF STARS (Sholar 1955)—37" Ev. Re.—Clear yellow sepals and brown petals. Greenish yellow throat. Sunfast flowers on strong, erect scapes.....	\$2.00
SHOW GIRL (Wheeler 1951)—42" Ev. Re.—Large orchid pink with deeper veining. Broad, ruffled, reflexed segments. H. M., 1953; A. M., 1956.....	\$0.50

SHOWTIME (Sass 1955)—40" De. Re.—Dark yellow self with strong scapes and excellent branching. Fragrant.	\$1.50
SIDESHOW (Russell 1947)—30" Ev. Re.—Large sunfast buff yellow. A. M., 1956.	\$0.50
SILVER SAILS (Connell 1956)—34" Ev.—Pale light yellow self. A large, full, near white which can take the sun. H. M., 1956; A. M., 1956.	\$3.00
SIBONEY (Stevens, J. C.-Baker, S. H. 1957)—35" De.—Soft salmon-peach self with greenish yellow throat.	\$2.00
SONATA (McDade 1948)—40" De. Re.—Very pale yellow with green throat. Segments wide. Flower opens in the evening and remains open through the following day.	\$0.75
SOUDAN (Stout 1933)—40" Ev. Re.—Lemon yellow with wide petals.	\$0.50
SOUTHERN BELLE (Fisher-Gillespie 1953)—48" Ev. Re.—Sunfast yellow.	\$0.50
SPICE (Taylor 1949)—36" Semi-ev. Re.—Rosy tan. Sunfast. H. M., 1952.	\$0.50
SPLENDOR (Stevens 1955)—34" De. Re.—Crimson with widespread, 6", sunfast blooms. Green throat. J. C., 1954; H. M., 1955.	\$4.00
SPRING FANTASY (Lester 1951)—34" De.—Large bicolor of lilac and clear light yellow. H. M., 1953.	\$0.75
SPRING PRIDE (Spalding 1956)—38" Ev. Re.—Large, full Aureolin yellow with a soft Majolica halo. Lovely, recurved flowers on a vigorous plant.	\$1.50
STEPHANIE (Buck 1950)—36" Ev. Re.—Large pale yellow of fine form. Numerous flowers on strong scapes. Another sunfast "near white."	\$1.00
STOUT 33-24-25 (Stout)—36" De. Re.—Deep rose pink. Full, sunfast flowers on well branched scapes.	\$2.00
SUGARCANE (Taylor 1954)—49" Ev. Re.—Light orange-red self (near pink). Large, sunfast flowers on well branched scapes. H. M., 1954.	\$1.25
SU-LIN (Nesmith 1949)—36" De. Re.—Bicolor of mauve and yellow. A. M., 1952.	\$0.50
SUMMER ORCHID (Gates 1956)—38" Ev.—Large yellow "spider" with green throat. Segments frilled and curled. Substance heavy. J. C., 1955; H. M., 1956.	\$1.00
SUMMER SHOWER (Milliken 1954)—40" Ev. Re.—Big, soft yellow with a touch of green in the throat. Wide open, sunfast flowers.	\$1.50
SUNDOWN (Taylor 1955)—36" Ev. Re.—Light chrome yellow heavily dusted with rose ash. 5", sunfast flowers with green throat. Open of evenings.	\$0.75
SUNSET SKY (Taylor 1952)—36" Ev. Re.—Dandelion yellow overlaid pink and rose. Wide segments of good substance. H. M., 1954.	\$1.00
SUNSTAR (Lester 1954)—36" Semi-ev.—Deep chrome yellow with long, narrow, recurving segments and a green throat. Large, sunfast flowers.	\$1.00
SUZANNE SIMON (Fay-Simon 1959)—32" De.—Flesh pink to melon pink. Midseason, extended blooming. Illustrated in color in "The Hemerocallis Journal," 1961. J. C., 1958; H. M., 1959.	\$15.00
SWANSDOWN (Hall 1955)—38" De.—Dresden yellow with broad segments. Sunfast flowers on strong, well branched scapes. J. C., 1953; H. M., 1955.	\$3.00
SWEET MYSTERY (Lester 1954)—36" De.—Pink and light yellow blend, deepening to pink as the day passes. J. C., 1953; H. M., 1955.	\$1.50
SWEET REFRAIN (Hall 1955)—30" De.—Pink of medium tone. Excellent in the sun. Plant vigorous. J. C., 1953; H. M., 1955.	\$1.00
SYLVAN NYMPH (Nesmith 1956)—37" De.—Naples yellow with chartreuse throat. Full flower with wide, ruffled segments. Extended bloomer. Well branched scapes.	\$7.00
SYMMETRY (Connell 1952)—34" Ev.—Light pink, overflushed tan, with a faint halo. Broad, sunfast segments with a 6" spread. Strong, erect scapes.	\$0.50
TATINE (Davis, C. W. 1953)—40" De. Re.—Sunfast yellow and pink bicolor.	\$0.75
TEMPLE BELLS (Hall 1957)—32" De.—Muskmelon self. Blooms all summer. J. C., 1955; H. M., 1957.	\$6.50
THE DIRECTOR (Russell 1945)—32" De. Re.—Large wine-red. Sunfast.	\$0.50
THE DOCTOR (Claar 1950)—36" Semi-ev. Re.—Brilliant vermilion scarlet of velvety texture. Broad segments on large, sunfast flowers. H. M., 1952; A. M., 1955.	\$1.50
THE GEM (Betscher 1929)—36" Ev.—Large, sunfast light yellow.	\$0.50
TIARA (Wheeler 1952)—40" Ev.—Large gold, dusted russett. Sunfast.	\$0.75
TOMOKA (Wheeler 1953)—30" Ev. Re.—Garnet brown with a black pile.	\$0.75
TOOTIE (Claar 1954)—34" Ev.—Clear pink with a satiny finish. Seedling of 'Evelyn Claar.' J. C., 1953; H. M., 1955.	\$1.50
TOUS LES JOURS (Major-Davis 1958)—30" Ev. Re.—Pink which blooms constantly and repeatedly from spring until late summer. Bois de Rose with apple green throat. Medium size, sunfast flowers. Scapes well branched.	\$3.00
TREASURE ISLAND (Davis, C. W. 1956)—34" Ev. Re.—Golden treasure of dark yolk	

yellow with a green throat. Beautifully formed, medium size, sunfast flowers. Wide, overlapping, slightly reflexed segments. Branching good. \$1.25

TWENTIETH CENTURY (Stevens, J. C. 1956)—44" De. Re.—English red with Brazil red halo. Large, sun resistant flowers on well branched scapes. J. C., 1956..... \$6.00

VERILITE (Connell)—38" Ev. Re.—One of the best of the large pale yellows. 6" flowers of good substance and with a chartreuse throat. \$1.50

WAR EAGLE (Hall 1957)—32" Ev. Re.—Large, full and widespread flowers of heavy substance and velvety texture in an oxblood red. Petals flaring and ruffled. Sepals recurved. J. C., 1955; H. M., 1957; A. M., 1960..... \$8.00

WAXWING (Nesmith 1953)—40" De.—Coral pink self with a frosty sheen. Numerous recurved flowers on well branched scapes. J. C., 1952; H. M., 1956..... \$2.00

WHEELER HALO (Wheeler 1943)—42" Ev. Re.—Evening blooming light yellow with light maroon halo. \$0.50

WHITE SAMITE (Kane, G. 1956)—36" De.—Light cream yellow self. Very fragrant. Nocturnal bloomer. \$1.25

WIDEYED (Craig 1954)—34" Ev. Re.—Big yellow with wide, dark halo of port wine. A bold and attractive color contrast. Sunfast flowers on strong scapes..... \$2.50

WINONA (Cook 1943)—42" De.—6" blooms of pale buff yellow. \$0.50

WINE CUP (Davis, C. W. 1959)—32" Ev. Re.—Deep rose with a faint red halo and yellow throat, merging into green. Flower full and widespread at the extremity. Sunfast flowers. Midseason to late midseason..... \$7.00

WONDER (Craig 1954)—30" Ev. Re.—Creamy yellow with light rose-brown halo. Sunfast flowers on low, compact plant. \$1.25

YELLOW COTTON (Davis, C. W. 1952)—42" Ev. Re.—Dandelion yellow..... \$0.50

YELLOW ORCHID (Bach 1955)—40" Ev.—Large flowers of deep yellow on strong, well branched scapes. Long period of bloom. Substance good. J. C., 1954..... \$1.50

ZEZETTE (Taylor 1948)—36" Ev. Re.—Marsh rose with yellow midrib..... \$0.50

DAYLILY SEED

Hand pollinated seed from the best clones at this nursery. These seed are from carefully selected crosses designed to bring about improvement in size, form, substance, color and/or scapes. Place orders throughout the year for deliveries during the months of July, August and September. If seed are planted as soon as received and the bed kept shaded and moist for two weeks, germination should be prompt. With proper care the plants should bloom in two years. This is an interesting and inexpensive means of securing many new and beautiful plants. Start now and have a few seedlings coming into bloom each year.

These seed will produce reds, light yellows, deep golds, pinks, melons, bicolors and "eyed" flowers.

Pkt. of 150-200 mixed seed..... \$1.00

CRINUMS

Crinums are large and showy, lily-like plants for the Lower South. They are appealing and intriguing hallmarks of old southern gardens, which have come into a new surge of popularity in recent years all over Southern United States and into California. The Powell varieties and *Crinum bulbispermum* are half hardy and may be grown with winter protection as far north as the Ohio River Valley.

The culture of these beautiful plants is easy. They may be moved at any time, but fall planting is highly recommended. If given a fertile soil, high in organic matter and watered frequently during the summer they will reward the gardener with a profusion of fragrant blooms. They will survive (but not thrive) and furnish some bloom during periods of neglect.

CRINUM AMERICANUM. White, star-shaped flowers. Late spring flowering..... \$1.00

CRINUM ASIATICUM. A giant among the Crinums, making bulbs up to 25 pounds and leaves 4 to 6 feet long. Large star-shaped white flowers on scapes 3 to 4 feet tall. Glossy, attractive foliage. \$1.00

CRINUM BULBISPERMUM. The most hardy and earliest to bloom. Handsome blue-green foliage. Pink and white flowers on 2' to 3' penduncles. Seeds freely..... \$1.00

CRINUM CAMPANULATUM. White with pink stripe in center of petals..... \$2.00

'CATHERINE'. Pure white hybrid of unknown origin. Ends of pistil and stamens are purple. Penduncle 2 to 3 feet. Flowers May to July..... \$1.50

'CECIL HOUDYSHEL.'	Deep rose pink hybrid. Considered by many to be the world's finest Crinum. Blooms repeatedly in spring and early summer.....	\$3.00
'ELLEN BOSANQUET.'	A very popular deep wine colored hybrid. Blooms in late June and July. Penduncle 3 feet tall.	\$1.50
'EMPRESS OF INDIA.'	Large, spreading, star-shaped flowers. Summer blooming. Probably not hardy north of Lower Gulf Coast. A winter mulch of leaves or peat moss is recommended. Very rare variety. Small bulbs.....	\$2.50
CRINUM ERUBESCENS.	Pure white with light pink keel. Blooms midsummer to late summer. Frequently called "Milk and Wine Lily."	\$1.50
CRINUM GIGANTEUM HYBRID.	Also known as Christopher Lily. Pure white, tulip or cup-shaped flowers. Very fragrant. Blooms in midsummer. The small bulbs increase rapidly through division.	\$1.00
'H. J. ELWES.'	Very beautiful pink. Makes small plant and bulbs.....	\$2.00
'J. C. HARVEY.'	A popular pink hybrid, blooming in June.....	\$2.00
'LOUIS BOSANQUET.'	A Powelli type with light pink flowers in July.....	\$1.50
'POWELLI var. ALBUM.'	A beautiful and vigorous white hybrid, blooming in May and June. Reportedly hardy in Tennessee and the Carolinas when given some winter protection.	\$2.00.
'POWELLI var. KRELAGEI.'	A soft shell pink of exquisite form. Grows in light shade with good feeding.	\$2.50
CRINUM SANDERIANUM.	Large white, trumpet-shaped flower with a bright red keel. Blooms in early spring and repeats. Penduncle 3' to 4' tall. The most spectacular of the early blooming Crinums.	\$2.00
CRINUM SCABRUM.	White with crimson keel. Penduncle 1' to 2' tall. Flowers in June in South Louisiana. Sets seed freely. Leaves with "scabrous" or wavy margins.	\$2.00

CRINODONNA (Synonym: Amarcrinum)

CRINODONNA CORSII	Clone 'Fred Howard.' Lovely, highly perfumed pink trumpet. A cross between Crinum Moorei and Brunsvigia rosea. Give culture as for Crinums. Blooms in late June and July.	\$2.50
CRINODONNA CORSII	Clone 'LON DELKIN.' Discovered on an old Japanese nursery by Lon Delkin of Arcadia, California. Slightly smaller, but seemingly more vigorous, and just as highly perfumed as 'Fred Howard.'.....	\$2.50

CHALICE LILIES

This includes a large number of amaryllid genera in which the lower parts of the stamens are usually modified to form a tube or staminal cup, which in many cases resembles a chalice—hence the name Chalice Lilies. In a few cases the lower parts of the stamens are not united, but are otherwise modified.

There are two subgroups. In one, subgenus Hymenocallis, the free parts of the stamens are upright. In the other, subgenus Ismene, the stamens are incurved.

HYMENOCALLIS

The scape is an unbel of 6 to 12 fragrant white flowers with membranous bracts. A number of species are native in the Lower Mississippi Valley and other parts of the Gulf Coast Region. They are not hardy in the colder regions and should only be attempted in the greenhouse.

AMERINDIAN CHALICE LILIES

HYMENOCALLIS AMERICANA	(Bailey)—An attractive garden plant with glabrous, deep green leaves, up to 32" in length and 2½" to 2¾" in width. Foliage grows from early spring until killed down by frost. Flowering in midsummer.	\$3.00
HYMENOCALLIS M-374	(Clint). Collected in the state of San Luis Potosi in Mexico by Mr. and Mrs. Morris Clint of Brownsville, Texas. Blooms in October. Foliage remains green from spring until frost, although it is evergreen in a frost-free climate	\$3.00

(Chalice lilies may be shipped in the fall or early spring).

LYCORIS SPECIES

These bulbous plants do well throughout the Lower South. The foliage growth is in fall, winter and spring and then dies down. Flowers appear without the foliage in late summer. Bulbs should be planted from June through September.

- LYCORIS RADIATA—The 'Red Spider Lily.' Mixed sizes of bulbs. (Dozen)..... \$1.50
LYCORIS AUREA—'Golden Hurricane Lily' of Florida. Each..... \$0.75

GLORIOSA ROTHSCILDIANA

(The Climbing Lily)

These gloriously beautiful, exotic plants attract more attention and more discussion from visitors than any other plants at this nursery. They come from East Africa, but will grow well in any part of the country where gladiolas may be grown. The vines are 3' to 6' long, supporting themselves by tendrils on the ends of the leaves. There are numerous large, showy flowers of crimson and yellow with the entire flower changing to light maroon after it is several days old. Excellent for arrangements or an individual flower may be used as a corsage.

Plant in sun or light shade, but the soil should be loose and friable. Heavy soils should be lightened up by the addition of sand and peat or compost. Planting is done when the weather begins to warm up in the spring. Tubers delivered in March. Single tuber—\$1.25; 3 tubers \$3.00

CURCUMA LATIFOLIA

(Ginger Lily)

This strikingly handsome foliage and flowering plant is the largest and probably the best of the 'Ginger or Hidden Lilies.' It is a relatively recent import from India by Mr. Wyndham Hayward of Winter Park, Florida. The spikes are 12" to 18" tall, coming up fully two weeks before the foliage appears. They are a pinwheel of rosy lavender bracts above the bright yellow, snapdragon-like flowers. They remain in bloom and are attractive for another two weeks after the foliage appears. The foliage is very ornamental, making a beautiful specimen plant six feet tall.

Tubers may be left in the ground during the winter in the Lower Gulf Coast, but should be protected by a light mulch. Delivery in February. \$2.00

NATIVE TREES AND SHRUBS

Chionanthus virginica.—Commonly known as the Fringetree or Grancy-graybeard. Native of the Gulf Coast Plains, it belongs to the Ash Family. In the spring it is covered with a mass of bluish-white flowers before the leaves appear. Requires the same culture as the Dogwood and Azalea. Grows about twenty feet in height. Shipped bare roots, 2 to 3 feet. \$3.00

Halesia diptera.—The Silverbell is a small tree, attaining a height of about 25 feet. The white flowers come in clusters of 3 to 6 in March and April, and are followed by winged fruits. The plant is widely distributed along small streams in the uplands of Louisiana, but may be used as an ornamental throughout the Lower South. Growth is rapid. Small seedling trees. \$1.00

Erythrina herbacea.—Coral Bean, Devil-in-the-Bush and Mamou are some of the common names for this ornamental deciduous shrub which is a member of the Pea Family. It blooms in the early summer on tall spikes of brilliant red flowers. In the fall the brown pods open, disclosing scarlet seed which retain their color indefinitely. A native of sandy loam soils from North Carolina to Texas, this plant is of easy culture on any light, well-drained soil. Blooming size..... \$3.00
